Strengths & Advantages

What makes Funding Alternatives the right choice for builders, developers & investors

POSITIONING STATEMENT

Funding Alternatives is a direct private lender with 20+ years in business, \$165M+ deployed, and a team that treats every borrower as a VIP. We close faster, lend more flexibly, and serve clients banks and brokers won't touch.

UNIQUE STRENGTHS & COMPETITIVE ADVANTAGES

01 Direct Lender — Own Capital, No Middleman

STRUCTURAL

- We fund loans from our own balance sheet — no broker chains, no third-party approval committees.
- One team makes the decision: faster approvals, clearer communication, full accountability.
- Borrowers deal with one named originator from application to closing — not a call center.
- No referral fees, no hidden markups from intermediaries passed to the borrower.

Impact: Builders and developers trust us because we control the process end-to-end.

02 20+ Years in Business — Since 2004

TRACK RECORD

- Operating since 2004 — survived the 2008 crisis, COVID, rate cycles, and market downturns.
- Management team brings 30+ years of combined financing experience across all asset classes.
- \$165M+ in loan origination volume and 350+ funded deals validate real execution capability.
- Institutional-grade underwriting discipline applied to private lending speed and flexibility.

Impact: Investors trust lenders who've been tested. We have. BrightPath has 10 years, half our track record.

03 Broadest Loan Program in the Market

PRODUCT RANGE

- 6 distinct products: Fix & Flip, Ground-Up, Bridge, DSCR/Rental, Commercial, Hard Money.
- Loan amounts from \$50K to \$5M+ — serves small investors and institutional developers alike.
- Bridge loans close in 5 days. Hard money with no income and no credit check.
- DSCR rates from 6.50% with 30-year terms — rare in private lending.

Impact: Clients bring ALL their deals to us — not just one product type. Higher lifetime value.

04 Foreign National Program — Rare Differentiator

MARKET ACCESS

- Explicit lending program for non-US investors — a major gap in the competitive market.
- Critical for South Florida: Miami market has massive capital inflow from Latin America & Europe.
- No other lender in our direct competitive set publicly offers this program.
- Positions FundingAlts as the go-to lender for international real estate investment in the Southeast.

Impact: Captures an entire buyer segment that competitors ignore.

05 Execution Certainty — Fast, Transparent Closings

RELIABILITY

- Bridge loans close in 5 business days. All other products close in 10 business days.
- Streamlined draw process keeps construction projects funded on schedule.
- No hidden costs — full transparency in terms, fees, and timelines upfront.
- Web-based doc upload system: loan intake in under 5 minutes, no branch visits.

Impact: In real estate, a lender that actually closes on time is worth more than a lower rate.

SELF-IDENTIFIED PAIN POINTS — AREAS TO IMPROVE

Website doesn't yet match the brand quality

- Current site design undersells the 20yr track record and \$165M volume — looks like a template.
- No published rate sheet or loan comparison tool — forces unnecessary back-and-forth with prospects.
- Thin social proof: testimonials lack specificity. Need named clients, deal types, and dollar amounts.
- Mobile experience needs improvement — primary audience (builders, developers) is often on-site on phones.

BrightPath Loans — Pain Points

Where the competitor falls short — and how FundingAlts wins each point

STRATEGIC SUMMARY

BrightPath is a lead-gen marketplace, not a direct lender. Stats on their page show \$0 lent and 0 loans funded. They contradict their own LTC claims 3 times on one page. FundingAlts is the credible alternative.

IDENTIFIED PAIN POINTS — BRIGHTPATH LOANS

01 Broker / Lead-Gen Model — Not a Direct Lender

HIGH

- Routes submissions to a 'network of elite lending firms' — they don't fund the deal themselves.
- Thank-you page says 'answer ALL calls' — borrowers get called by multiple unknown lenders.
- No single originator, no accountability, no transparency on who actually funds the loan.
- Consent form includes i2i Media and 'lending partners' — a classic lead aggregator structure.

FundingAlts: Direct lender. One team. One originator. We fund the loan ourselves.

02 Contradictory LTC Claims on One Page

HIGH

- Hero section: 'up to 90% LTC'. FAQ: 'up to 95% LTC'. Footer section: 'up to 80% LTC'.
- Three different numbers for the same metric on one page — a major trust red flag.
- No published rate ranges anywhere on the page — borrowers can't self-qualify.
- Stats section shows '\$0 Dollars Lent' and '0 Real Estate Loans' — unfilled placeholders.

FundingAlts: Transparent published rates from 8.75%. Consistent 92.5% LTC across all content.

03 \$200K Minimum + 660 FICO — Excludes Smaller Deals

MEDIUM

- Hard floor of \$200K with an on-page rejection message for smaller requests.
- Minimum 660 FICO — no bridge product for 620+ borrowers, no asset-based hard money.
- Locks out smaller builders, first-time developers, and investors with thin credit profiles.
- No foreign national program mentioned anywhere on site.

FundingAlts: Loans from \$50K. Bridge at 620+ FICO. Hard money with no credit check. Foreign nationals welcome.

04 Zero Verified Social Proof or Track Record

MEDIUM

- Testimonials are anonymous ('Developer, TX') — no names, company, deal size, or outcome.
- Stats section has placeholder zeros — signals a new or unverified operation.
- Claims '10 years' of experience but has no funded deal gallery or portfolio page.
- No team page, no named originators, no faces — anonymous brand in a trust-driven industry.

FundingAlts: \$165M+ volume, 350+ loans, real deal gallery, named team, 20+ years since 2004.

05 Phone Verification Barrier + Heavy Form Friction

MEDIUM

- Lead form requires SMS verification code before submission — kills mobile conversions.
- Four mandatory checkbox confirmations required before submitting the form.
- A builder on a job site won't wait for an SMS code. Drop-off is significant at this step.
- No 'talk to someone first' path for hesitant borrowers — binary apply-or-leave experience.

FundingAlts: Simple name/email/phone/message form. No verification. No friction. 5 minutes to apply.

06 No Foreign National or Hard Money Program

LOW

- No mention of foreign national investors — a huge missed segment in FL/TX/GA markets.
- No hard money product visible — ignores credit-challenged but asset-rich borrowers.
- Missing ITIN borrower program — excludes significant portion of South Florida real estate market.
- Entire international buyer segment (Latin America, Europe) underserved by BrightPath.

FundingAlts: Explicit foreign national program. Hard money from 12%. No income / no credit check options.
